SUMMARY

Full stack web developer leveraging an Information Services and Education background for a well rounded skill set. Skills in HTML, CSS, and JavaScript as well as mature work ethic, passion for challenges, and an ever-learning mindset. Self-taught C#, Java and the above languages, while continuing education in the University of Texas Coding Bootcamp. Successfully led the adaptation to online collaboration and learning in a managerial and training role, which led to the passion for collaboration in all settings, online and face-to-face. Excited to develop responsive websites with the brand's intentions and user friendliness as the guiding factors.

TECHNICAL SKILLS

- **Languages: HTML, CSS, JavaScript, Bootstrap, Foundation, C#, Object Oriented Programming, Web Server, 3rd party APIs, MySQL, Sequelize, Dotenv, Heroku, MongoDB, MERN, GraphQL**
- **Applications: Visual Studio, Unity, Node.js**
- **Comfortable working in fast paced, high stress environments**
- **Desktop Support**
- **Excellent Customer Service and Communication**

PROJECTS

Run Buddy | <https://github.com/GunnySensei/run-buddy> | <https://gunnysensei.github.io/run-buddy/>

- This is a mockup of a personal trainer company's web page. It is mobile adaptive, stylized, and presented as a template for a customer.
- Made from scratch in HTML, CSS, and JavaScript.
- Solo developed in about 1 week.

Weather Dashboard | <https://github.com/GunnySensei/weather-dashboard> | <https://gunnysensei.github.io/weather-dashboard/>

- This is a dashboard for showing the weather for any city searching by name. It shows current detailed weather, a 5-day forecast, and saves a history of searched city in a clickable button.
- Created from scratch with HTML, CSS, and JavaScript
- Solo developed in about 1 week

Workday Scheduler | <https://github.com/GunnySensei/workday-scheduler> | <https://gunnysensei.github.io/workday-scheduler/>

- This is a timetable scheduler for your workday. It shows the past/current/future times via color, editable task sections and a save button that will save to local storage for the user.
- Created from scratch with HTML, CSS, and JavaScript
- Solo developed in about 1 week

Brewhaus | https://github.com/jaredtrp/project_cheese | https://jaredtrp.github.io/project_cheese

- This is a Beer recommending website that pulls from the BrewDog Brewery API and the OpenWeather API to present a random beer to the user. If the weather is below 65 degrees Fahrenheit, it will present beers about 7.5 ABV, and for weather above this, a lower ABV is shown to the user.
- Created from scratch with HTML, CSS, and JavaScript

- This was a team project with 6 other programmers. My main focus was creating dynamic elements in JavaScript using the data from the APIs pulled.

EXPERIENCE

Centre Technologies | IT Consultant | Austin, TX

- 9/2021 – Present
- IT customer service providing network, hardware, SaaS and PaaS support. Uses professionalism in written and oral communication. Creates documentation for organizational use and customer service.

Chungdahm Learning Institute | Head Instructor | Dongtan, South Korea

- 10/2018 – 8/2021
- Manager of 15 instructors. Duties included training on material and new systems/policy. Technical support across the campus for native English speakers and non-native English speakers. Initially used FTP servers for documentation until personally upgrading campus to Google servers and Slack with training provided. Designer and implementer of online classes and system during initial phase of Covid-19, created documentation for further usage and trained multiple branches on the use of the system.

Fayetteville, AR Police | Dept Dispatcher II | Fayetteville, AR

- 8/2016 – 8/2018
- Troubleshooting provided over the phone, chatting, and in person to officers in the field and dispatchers in the office. Lead the implementation of KVM switches for the CAD system over 7 computer systems along with documentation and training
